Message from President Elect

Issue
February 2014

by Dr. Ng King Wah, Bobby 吳健華醫生

The Year of the Horse and all things great and small

Dear fellows and members,

Kung Hei Fat Choy and a Prosperous Successful New Year to all!

The year of the Horse sends with it an extra-long Chinese year. It is a leap year where there would be thirteen months. It comes every three years and we will have 383 days in this year of the Horse. The 11th month from the 11th month of the previous year determines the leap month when there is 13 moons in the year. So we'll have a double September lunar month in 2014! The well wish message from the arrival of the Horse is that it would bring us to success and achievements. It is a year that we should make plans to benefit from this good wish.

From the HKOA calendar and the machinery, the council will set our targets and fix events for this according to the normal Gregorian year.

All thing great is to look forward to the 2015 HKOA when we will be celebrating the 50 years anniversary of our association. Our association started with our first president in 1965 by Professor AR Hodgson. He has left great legacy to our association and our locality from his endeavors in Orthopaedic Surgery. It is a time we start recounting these great moments in Orthopaedics in the history of Orthopaedic surgery in Hong Kong to allow us to learn again how we had come about and ways to strengthen our association. The inspiration that all the great Past Presidents had left us is their devotion and dedication to study orthopaedic challenges in all things great and small to develop innovative treatment that made history.

The birth of our association almost 50 years ago must have the same intention as today of bringing all our members together to allow collaboration of all our members. We must ensure that this is done with good communications and participation of all our members. Only by this we can strengthen and consolidate our association. The association had started the subspecialty funding education activities to achieve this goal. I would encourage all subspecialties chapters and members to make plan to run activities to bring all our members to different activities for learning to make our association alive. The council will continue to consolidate the function of the association to create environments to bring our members together be it educational or social. I would like to call for your support of our association is that the first thing to do is to visit our web site more frequently. Stay active and support your chapters and the association by active participation of our future events.

I wish you all a Happy and Active Year of the Horse and Success all things Great and Small!

Dr Bobby KW NG
President Elect HKOA, February 2014
